Press Release

NuLasers Ltd. offers miniature 488 nm laser diode module

NuLasers Ltd. markets temperature stabilized laser diode modules with a head size of just 30 x 31 x 34 mm.

Laser diodes manufactured by NICHIA Corporation at 488 nm are utilized in a miniature laser diode module CLD-488-XX with temperature stabilization of the laser diode and all optical elements. High pointing stability, low output power fluctuations and stable wavelength are achieved. Customized models can fit wide user requirements.

Applications:

Bioinstrumentation
